

Elastilon-Lock®

NEW LAYING SYSTEM WITH GREAT ADHESIVE POWER

New way to fix a floor
IN-BETWEEN FLOOR + GLUING + LAYING SYSTEM

All 3 in ONE

Tested by IFF (Institut für Fussbodentechnologie) in Koblenz.

RESULT:

"The probe surfaces showed a good to excellent **interlocking FIX-connection between the adhesive mat to the underfloor**"

FROM NOW ON:

The adhesive mat will be rolled out fast and effectively **AT ONCE** all over the surface: no more laboriously or time-consuming application with glue spatula.

No more limits because of a constraining **OPEN TIME**.
No glue, no nails, no clips.

TOTAL JOINT and complete UNITY with the subfloor. No adhesive rills, but absolute 100 % full-spread gluing absolute 100% **FULL-SPREAD GLUING**

LAY METHOD:

Fast, clean and exceptionallt simple.

- No adhesive marks on parquet flooring.
- Practically no lay- or attachment defects possible.
- No emission, no smell or irritation.
- **NOISE OF FOOTSTEPS reduced to whisper**
- Also particularly suited for parquet in combination with **UNDERFLOOR HEATING** thanks to **Total contact** with underfloor heating system
